

# Suction table

*Suitable for*

*Extraction from below of fumes and dusts – e.g. for manual plasma arc cutting*

Suction table

### Description

Stable construction for extraction from below. A baffle plate distributes the pollutants inside the bench and calms the air flow.

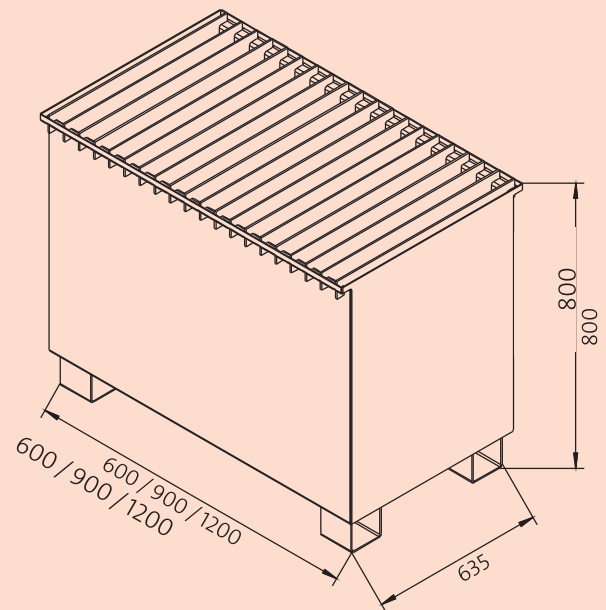

We would be glad to advise you regarding the choice of the appropriate filter units or fans.

### Standard equipment

- ▶ Support made of flat iron
- ▶ Baffle plate

### Available as an option

- ▶ Support made of refractory bricks
- ▶ Special dimensions on request
- ▶ Suction arm

### Technical data / Available versions

Suction table				PG3
Depth: 635 mm · Height: 800 mm				
Width	Required volumetric flow of the fan	Suction nozzle		
600 mm	1500 m <sup>3</sup> /h	∅ 160 mm	56 200	1040,00 €
900 mm	2000 m <sup>3</sup> /h	∅ 200 mm	56 210	1 208,00 €
1200 mm	2500 m <sup>3</sup> /h	∅ 250 mm	56 220	1 428,00 €

*Suitable for*

*Education and training centres as well as industrial plants*

## Description

Stable welding bench made of sectional steel.  
A simple assembly is ensured.

## Available as an option

- ▶ Downhand welding device
- ▶ Special dimensions on request

## Standard equipment

- ▶ Bar iron grating
- ▶ Refractory bricks

# Grinding bench

*Suitable for*

*Rear wall extraction and extraction from below for grinding tasks.*

Grinding bench (Art. No. 56 410)

### Description

Here you find a selection of standard grinding benches.

The dusts are extracted on the back and below. 90 % of the extracted particles are already extracted by the rear wall and can safely and easily be disposed of by means of the dust collecting tray.

We gladly advise you regarding the choice of filter units or fans.

### Available as an option

- ▶ Side panels
- ▶ Lamella curtains folding type
- ▶ Partial roof with lighting
- ▶ Special dimensions on request

### Standard equipment

- ▶ Rear wall extraction
- ▶ Flat iron support or wooden support
- ▶ Pre-separator
- ▶ Dust collecting tray
- ▶ 2 temporary covers for nozzles
